K95 Plus

Upgrade for classic excellence

Upgraded product based on excellent K95 series products, K95 plus with the intelligent 10.1-inch" touch screen which meets the individual needs for different scenarization coffees. Combining the system with UI 2.0 offers better using experience.Perfectly adaptable to various scenarios, a better experience for you.

Features

EXCELLENT IN-CUP QUALITY

Continuous extraction with cup volume deviation±5%, coffee temperature deviation±3℃. Kalerm has achieved perfection in all aspects to create well-prepared coffee. The patented brewing unit with capacity of 7 to 16g permits larger brewing batches in a single step, its stable pressure control ensures wonderful coffee experience.

UPGRADED MILK FOAM SYSTEM TO PROVIDE DELICATE AND SMOOTH EXPERIENCE

The new milk foam device is upgraded and the manual adjustment switch of milk intake rate is increased. The milk foam temperature and milk temperature are changed by adjusting the intake rate, providing an excellent experience of fine and smooth high-temperature milk foam.

EASY OPERATION

Beverage preparation: 10.1-inch" color touch display with UI 2.0 system helps prepare the beverages efficiently with one touch and adjust the parameters of the beverages flexibly.

Cleaning and maintenance: The machine rinses itself when turned on or off. Cleaning and maintenance are recommended based on usage frequency, with intelligent reminders.

Technical advantages

ACCURATE GRINDING

The self-developed high-precision grinding system adopts imported metal cone cutters, which are suitable for coffee beans with different roasting degrees. The particle size of the grinding powder is uniform.

ROBUST BREWING UNIT

The professional brewing system developed by Kalerm can reach 9 bar of extraction pressure and over 19% extraction rate.

IoT CLOUD (OPTIONAL)

Kalerm Coffee Cloud offers you a comprehensive coffee machine management solution: real-time equipment status monitoring, beverage statistics tracking, malfunction events recording, operation and maintenance management, online batch beverage customization and remote Ad contents switching.
